Proceedings (Plant Sciences)

Volume 98, 1988

SUBJECT INDEX

Accelerated degradation
Degradation of carbofuran and carbaryl by a suspension from a flooded soil incubated at 35°C and retreated with carbofuran 299
Acid and alkaline phosphatases
Properties of phosphatases from green alga *Scenedesmus incrassatulus* Bahlin and blue-green alga *Synechococcus aeruginosus* Nag 475
Affinity chromatography
Isolation of a cytokinin-binding protein from *Cucumis sativus* cotyledons 269
Aflatoxin
Aflatoxin-producing fungi in stored paddy 291
Agrobacterium tumefaciens
Transformation of the grain legume *Vigna aconitifolia* Jacq Marechal by *Agrobacterium tumefaciens*, regeneration of shoots 495
Air spora
Airborne fungal spores at Nagarjunanagar 191
Distribution of fungal spores within and above a crop of rice 25
Allocation pattern
Architectural plasticity of two bamboo species (*Nehouzeua dulloa* A Camus and *Dendrocalamus hamiltonii* Nees and Arn.) in successional environments in north-east India 121
Anacardiaceae
Chemotaxonomic studies on some members of Anacardiaceae 205
Andersen sampler
Wind-tunnel estimation of fungi colonizing sorghum seed from field to storage 501
Annonaceae embryology
Anther development in *Xylopia nigricans* 251
Anther development
Anther development in *Xylopia nigricans* 251
Antipodes
Wandlabyrinthe in the embryo sac of *Nigella damascena* Linn. 261
Apocynaceae
Foliar epidermis and taxonomy in Apocynaceae 409
Architecture
Architectural plasticity of two bamboo species (*Nehouzeua dulloa* A Camus and *Dendrocalamus hamiltonii* Nees and Arn.) in successional environments in north-east India 121
Azolla pinnata
Influence of rice crop canopy on growth and nitrogen fixation of water fern *Azolla pinnata* 209
Azospirillum brasilense
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Azospirillum lipoferum
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483

Bamboos
Architectural plasticity of two bamboo species (*Nehouzeua dulloa* A Camus and *Dendrocalamus hamiltonii* Nees and Arn.) in successional environments in north-east India 121
Banjara lake
Seasonal nutrient status of Banjara lake, Hyderabad 515
Biomass
Biomass structure and net primary production of Siwalik chir pine (*Pinus roxburghii* Sarg.)—mixed broadleaf forest 307
Biotechnology
Plant tissue culture: Perceptions and realities 425
Blue-green alga
Properties of phosphatases from green alga *Scenedesmus incrassatulus* Bahlin and blue-green alga *Synechococcus aeruginosus* Nag 475
Brachiolejeunea
Status of *Brachiolejeunea* (Spruce) Schiffn. in India 1
Brassica juncea
Yield and oil content of doubled haploids of mustard (*Brassica juncea* (L.) Czern. and Coss.) 405
Bryophyta
Status of *Brachiolejeunea* (Spruce) Schiffn. in India 1

C_3 and C_4
Ammonium accumulation and glutamine synthetase activity in C_3 and C_4 plants 199
C_4 grasses
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Cajanus cajan
Response of pigeon pea to variable levels of manganese 283
Carbaryl
Degradation of carbofuran and carbaryl by a suspension from a flooded soil incubated at 35°C and retreated with carbofuran 299

Carbofuran
Degradation of carbofuran and carbaryl by a suspension from a flooded soil incubated at 35°C and retreated with carbofuran 299
Caryocaraceae
Morphological aspects and taxonomical prospects of leaf idioblasts in Pandaceae and Caryocaraceae 31
Cenchrus
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Central Himalaya
Biomass structure and net primary production of Siwalik chir pine (*Pinus roxburghii* Sarg.)—mixed broadleaf forest 307
Chemotaxonomy
Chemotaxonomic characters in twelve species of the genus *Pennisetum* (Poaceae) 111
Chemotaxonomic studies on some members of Anacardiaceae 205
Chir pine
Biomass structure and net primary production of Siwalik chir pine (*Pinus roxburghii* Sarg.)—mixed broadleaf forest 307
Chl *a* fluorescence
Rhythmic oscillations in wheat chloroplast photochemical activity. II. Further characterization of the rhythm in photosystem II photoelectron transport activity 175
Chloris
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Chlorophyceae
Oedogoniales of Uttar Pradesh, India—*Oedogonium* Link 465
Chlorophyll
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Chloroplast activity
Rhythmic oscillations in wheat chloroplast photochemical activity. I. Oscillations in whole chain, photosystem II and photosystem I electron transport activities 157
Chromosome numbers
Cytology and distribution pattern of woody species of Verbenaceae in Palni hills 139
Cicer arietinum
Effect of some phenolic acids on quality and yield of chickpea seeds 61
Cicer
Seed protein electrophoresis in six species and two F_1s of *Cicer* 183
Cloning
Plant tissue culture: Perceptions and realities 425
Clusterbean
Plant age, temperature and free moisture in relation to susceptibility of clusterbean to *Xanthomonas campestris* pv. *cyamopsidis* 49
Coefficient of variation
Growth and foliar variation among provenances of *Eucalyptus camaldulensis* Dehn. grown at Dehradun 507
Compositae
Cytological studies in *Launaea pinnatifida* Cass 395
Copper
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Correlation
Growth and foliar variation among provenances of *Eucalyptus camaldulensis* Dehn. grown at Dehradun 507
Cotton callus
Growth and metabolism in cotton and tobacco callus cultures 277
Cucumis sativus
Isolation of a cytokinin-binding protein from *Cucumis sativus* cotyledons 269
Cynodon
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Cytokinin-binding protein
Isolation of a cytokinin-binding protein from *Cucumis sativus* cotyledons 269
Cytological investigation
Response to radiation and *in vitro* growth of two species of *Luzula* with non-localised centromere 489
Cytology
Cytological studies in *Launaea pinnatifida* Cass 395

Decomposition
Pattern of immobilization and release of nitrogen in decomposing leaf litter in Himalayan forests 215
Decomposition constant
Pattern of immobilization and release of nitrogen in decomposing leaf litter in Himalayan forests 215
Diatoms
Uptake and assimilation of nitrogen by marine diatoms-II. Kinetics of nitrogen assimilation 89
Dichanthium
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Digitaria
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Digitization
Computer-assisted image analysis in biological sciences 227
Distribution
Cytology and distribution pattern of woody species of Verbenaceae in Palni hills 139

Doubled haploids
Yield and oil content of doubled haploids of mustard (*Brassica juncea* (L.) Czern. and Coss.) 405

Ecosystems
New nodulating papilionoid legumes of potential value for revegetation of degraded ecosystems 41
Electron transport
Rhythmic oscillations in wheat chloroplast photochemical activity. I. Oscillations in whole chain, photosystem II and photosystem I electron transport activities 157
Electrophoresis
Seed protein electrophoresis in six species and two F_1s of *Cicer* 183
Embryo
Development of gametophytes, embryogeny and pericarp in *Goodyera repens* (Orchidaceae, Neottieae) 149
Embryo sac wall
Wandlabyrinthe in the embryo sac of *Nigella damascena* Linn. 261
Embryo symmetry
Endosperm controls symmetry changes in the developing embryos of angiosperms 257
Endogenous rhythms
Rhythmic oscillations in wheat chloroplast photochemical activity. I. Oscillations in whole chain, photosystem II and photosystem I electron transport activities 157
Endosperm
Endosperm controls symmetry changes in the developing embryos of angiosperms 257
Enrichment culture
Degradation of carbofuran and carbaryl by a suspension from a flooded soil incubated at 35°C and retreated with carbofuran 299
Enzyme activities
Growth and metabolism in cotton and tobacco callus cultures 277
Enzymes
Response of pigeon pea to variable levels of manganese 283
Epiphytic
Oedogoniales of Uttar Pradesh, India—*Oedogonium* Link 465
Euglenineae
Contributions to our knowledge of Indian algae—3. Euglenineae Part 3. The genera *Trachelomonas* Ehrenberg and *Strombomonas* Deflandre 317

Flavonols
Chemotaxonomic studies on some members of Anacardiaceae 205
Flooded soil
Degradation of carbofuran and carbaryl by a suspension from a flooded soil incubated at 35°C and retreated with carbofuran 299
Foliar epidermis
Foliar epidermis and taxonomy in Apocynaceae 409
Foliar idioblasts
Morphological aspects and taxonomical prospects of leaf idioblasts in Pandaceae and Caryocaraceae 31
Free moisture
Plant age, temperature and free moisture in relation to susceptibility of clusterbean to *Xanthomonas campestris* pv. *cyamopsidis* 49
Frullanoides
Status of *Brachiolejeunea* (Spruce) Schiffn. in India 1
Fungal spores
Distribution of fungal spores within and above a crop of rice 25
Fungi
Aflatoxin-producing fungi in stored paddy 291
Fungi on *Xanthorrhoea*
A new species of *Spegazzinia* from Western Australia 67

Gametophyte
Development of gametophytes, embryogeny and pericarp in *Goodyera repens* (Orchidaceae, Neottieae) 149
Gamma-irradiation
Response to radiation and *in vitro* growth of two species of *Luzula* with non-localised centromere 489
Gibberellic acid
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Gigaspora spp
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Glomus fasciculatum
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Glomus spp
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Glutamate dehydrogenase
Uptake and assimilation of nitrogen by marine diatoms—II. Kinetics of nitrogen assimilation 89
Glutamine synthetase
Uptake and assimilation of nitrogen by marine diatoms—II. Kinetics of nitrogen assimilation 89
Ammonium accumulation and glutamine synthetase activity in C_3 and C_4 plants 199

Goodyera repens
Development of gametophytes, embryogeny and pericarp in *Goodyera repens* (Orchidaceae, Neottieae) 149
Grain legume
Transformation of the grain legume *Vigna aconitifolia* Jacq Marechal by *Agrobacterium tumefaciens*, regeneration of shoots 495
Gramicidin
Rhythmic oscillations in wheat chloroplast photochemical activity. I. Oscillations in whole chain, photosystem II and photosystem I electron transport activities 157
Green alga
Properties of phosphatases from green alga *Scenedesmus incrassatulus* Bahlin and blue-green alga *Synechococcus aeruginosus* Nag 475
Growth
Growth and allocation strategy of some important species of seral grasslands at Cherrapunji in north-eastern India 13
Growth and metabolism in cotton and tobacco callus cultures 277
Growth pattern
Architectural plasticity of two bamboo species (*Nehouzeua dulloa* A Camus and *Dendrocalamus hamiltonii* Nees and Arn.) in successional environments in north-east India 121

Hill-reaction activity
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Himalayan forests
Pattern of immobilization and release of nitrogen in decomposing leaf litter in Himalayan forests 215
Hydroxylamine
Rhythmic oscillations in wheat chloroplast photochemical activity. II. Further characterization of the rhythm in photosystem II photoelectron transport activity 175
Hyphomycete
A new species of *Spegazzinia* from Western Australia 67

Image analysis
Computer-assisted image analysis in biological sciences 227
Immobilization
Pattern of immobilization and release of nitrogen in decomposing leaf litter in Himalayan forests 215
In vitro
Plant tissue culture: Perceptions and realities 425
In vitro growth
Response to radiation and *in vitro* growth of two species of *Luzula* with non-localised centromere 489

Indian algae
Contributions to our knowledge of Indian algae—3. Euglenineae Part 3. The genera *Trachelomonas* Ehrenberg and *Strombomonas* Deflandre 317
Indian mustard
Yield and oil content of doubled haploids of mustard (*Brassica juncea* (L.) Czern. and Coss.) 405
Integuments initiation
Development of gametophytes, embryogeny and pericarp in *Goodyera repens* (Orchidaceae, Neottieae) 149

Jungermanniales
Status of *Brachiolejeunea* (Spruce) Schiffn. in India 1

Kinetics of nitrogen uptake
Uptake and assimilation of nitrogen by marine diatoms—I. Kinetics of nitrogen uptake 71

Lasiurus
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Latitude
Growth and foliar variation among provenances of *Eucalyptus camaldulensis* Dehn. grown at Dehradun 507
Launaea pinnatifida Cass
Cytological studies in *Launaea pinnatifida* Cass 395
Leaf architecture
Leaf architecture in Tamaricaceae 471
Leaf esterases
Chemotaxonomic characters in twelve species of the genus *Pennisetum* (Poaceae) 111
Leaf litter
Pattern of immobilization and release of nitrogen in decomposing leaf litter in Himalayan forests 215
Leaf proteins
Chemotaxonomic characters in twelve species of the genus *Pennisetum* (Poaceae) 111
Leaf tissue
Response of pigeon pea to variable levels of manganese 283
Legumes
New nodulating papilionoid legumes of potential value for revegetation of degraded ecosystems 41
Lejeuneaceae
Status of *Brachiolejeunea* (Spruce) Schiffn. in India 1
Luzula spp.
Response to radiation and *in vitro* growth of two species of *Luzula* with non-localised centromere 489

Manganese
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Manganese deficiency
Response of pigeon pea to variable levels of manganese 283
Marine diatoms
Uptake and assimilation of nitrogen by marine diatoms—I. Kinetics of nitrogen uptake 71
Mass production
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Microscopy
Computer-assisted image analysis in biological sciences 227
Microsporogenesis
Anther development in *Xylopia nigricans* 251
Multisporangiate anther
Anther development in *Xylopia nigricans* 251

N_2-fixation
Influence of rice crop canopy on growth and nitrogen fixation of water fern *Azolla pinnata* 209
N^6-(Δ^2-isopentenyl) adenosine
Isolation of a cytokinin-binding protein from *Cucumis sativus* cotyledons 269
NH_4^+ levels
Ammonium accumulation and glutamine synthetase activity in C_3 and C_4 plants 199
Nitrate reductase
Uptake and assimilation of nitrogen by marine diatoms—II. Kinetics of nitrogen assimilation 89
Nitrate reductase activity
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Nitrate reduction
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Nitrate uptake
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Nitrite reductase
Uptake and assimilation of nitrogen by marine diatoms—II. Kinetics of nitrogen assimilation 89
Nitrogen assimilation
Uptake and assimilation of nitrogen by marine diatoms—I. Kinetics of nitrogen uptake 71
Uptake and assimilation of nitrogen by marine diatoms—II. Kinetics of nitrogen assimilation 89
Nitrogen concentration
Pattern of immobilization and release of nitrogen in decomposing leaf litter in Himalayan forests 215
Nitrogenase activity
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Nitrogenous nutrients
Seasonal nutrient status of Banjara lake, Hyderabad 515
Nodulation
New nodulating papilionoid legumes of potential value for revegetation of degraded ecosystems 41
Non-localised centromere
Response to radiation and *in vitro* growth of two species of *Luzula* with non-localised centromere 489
North-Western Himalaya
New nodulating papilionoid legumes of potential value for revegetation of degraded ecosystems 41
Northern and Southern populations
Growth and foliar variation among provenances of *Eucalyptus camaldulensis* Dehn. grown at Dehradun 507
Nutrient
Growth and allocation strategy of some important species of seral grasslands at Cherrapunji in north-eastern India 13
Nutrient uptake efficiency
Growth and allocation strategy of some important species of seral grasslands at Cherrapunji in north-eastern India 13
Nutrient use efficiency
Growth and allocation strategy of some important species of seral grasslands at Cherrapunji in north-eastern India 13

Oedogoniales
Oedogoniales of Uttar Pradesh, India—*Oedogonium* Link 465
Oil content
Yield and oil content of doubled haploids of mustard (*Brassica juncea* (L.) Czern. and Coss.) 405
Orchidaceae
Development of gametophytes, embryogeny and pericarp in *Goodyera repens* (Orchidaceae, Neottieae) 149

Paddy
Aflatoxin-producing fungi in stored paddy 291
Pandaceae
Morphological aspects and taxonomical prospects of leaf idioblasts in Pandaceae and Caryocaraceae 31

Pericarp
Development of gametophytes, embryogeny and pericarp in *Goodyera repens* (Orchidaceae. Neottieae) 149
Periodicity
Airborne fungal spores of Nagarjunanagar 191
Perlite
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Phenolic compounds
Effect of some phenolic acids on quality and yield of chickpea seeds 61
Phenolics
Chemotaxonomic characters in twelve species of the genus *Pennisetum* (Poaceae) 111
Photorespiratory nitrogen cycle
Ammonium accumulation and glutamine synthetase activity in C_3 and C_4 plants 199
Photosystem II
Rhythmic oscillations in wheat chloroplast photochemical activity. II. Further characterization of the rhythm in photosystem II photoelectron transport activity 175
Photosystems I and II
Rhythmic oscillations in wheat chloroplast photochemical activity. I. Oscillations in whole chain, photosystem II and photosystem I electron transport activities 157
Phytoplankton production
Diurnal and seasonal variations in the phytoplankton production of lake Kondakarla 99
Pinus kesiya
Seedling emergence and development of *Pinus kesiya* Royle ex Gord. and *Schima khasiana* Dyer 399
Plant age
Plant age, temperature and free moisture in relation to susceptibility of clusterbean to *Xanthomonas campestris* pv. *cyamopsidis* 49
Polyploidy
Cytology and distribution pattern of woody species of Verbenaceae in Palni hills 139
Protein
Seed protein electrophoresis in six species and two F_1s of *Cicer* 183
Provenance
Growth and foliar variation among provenances of *Eucalyptus camaldulensis* Dehn. grown at Dehradun 507

Quality
Effect of some phenolic acids on quality and yield of chickpea seeds 61
Quercus spp
Biomass structure and net primary production of Siwalik chir pine (*Pinus roxburghii* Sarg.)—mixed broadleaf forest 307

Radio sensitivity
Response to radiation and *in vitro* growth of two species of *Luzula* with non-localised centromere 489
Relative growth rate
Seedling emergence and development of *Pinus kesiya* Royle ex Gord. and *Schima khasiana* Dyer 399
Resource allocation
Growth and allocation strategy of some important species of seral grasslands at Cherrapunji in north-eastern India 13
Rhodes grass
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Rhythmicity in chloroplast activity
Rhythmic oscillations in wheat chloroplast photochemical activity. II. Further characterization of the rhythm in photosystem II photoelectron transport activity 175
Rice crop
Distribution of fungal spores within and above a crop of rice 25
Rice crop canopy
Influence of rice crop canopy on growth and nitrogen fixation of water fern *Azolla pinnata* 209
Root nitrogenase activity
N_2-fixation (N_2-ase activity) in *Azospirillum* strains 483
Rotorod sampler
Airborne fungal spores at Nagarjunanagar 191
Ruakura nutrient solution
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135

Schima khasiana
Seedling emergence and development of *Pinus kesiya* Royle ex Gord. and *Schima khasiana* Dyer 399
Sclereids
Morphological aspects and taxonomical prospects of leaf idioblasts in Pandaceae and Caryocaraceae 31
Sclerocystis pakistanica
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Seasonal and diurnal variation
Diurnal and seasonal variations in the phytoplankton production of lake Kondakarla 99
Seasonal changes
Seasonal nutrient status of Banjara lake, Hyderabad 515
Secondary succession
Architectural plasticity of two bamboo species

(*Nehouzeua dulloa* A Camus and *Dendrocalamus hamiltonii* Nees and Arn.) in successional environments in north-east India 121
Seed
Seed protein electrophoresis in six species and two F_1s of *Cicer* 183
Seed microflora of sorghum
Wind-tunnel estimation of fungi colonizing sorghum seed from field to storage 501
Seedlings
Seedling emergence and development of *Pinus kesiya* Royle ex Gord. and *Schima khasiana* Dyer 399
Sesamum indicum
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Shading effects
Influence of rice crop canopy on growth and nitrogen fixation of water fern *Azolla pinnata* 209
Silica
Seasonal nutrient status of Banjara lake, Hyderabad 515
Soilrite mix
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Soluble reactive phosphorus
Seasonal nutrient status of Banjara lake, Hyderabad 515
Somatic generative approaches
Plant tissue culture: Perceptions and realities 425
Spegazzinia
A new species of *Spegazzinia* from Western Australia 67
Spores
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Sporocarps
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Stomatal ontogeny
Foliar epidermis and taxonomy in Apocynaceae 409
Strombomonas
Contributions to our knowledge of Indian algae—3. Euglenineae Part 3. The genera *Trachelomonas* Ehrenberg and *Strombomonas* Deflandre 317
Sub-Himalayan Siwalik range
Biomass structure and net primary production of Siwalik chir pine (*Pinus roxburghii* Sarg.)—mixed broadleaf forest 307
Susceptibility
Plant age, temperature and free moisture in relation to susceptibility of clusterbean to *Xanthomonas campestris* pv. *cyamopsidis* 49
Synergids
Wandlabyrinthe in the embryo sac of *Nigella damascena* Linn. 261

Tamaricaceae
Leaf architecture in Tamaricaceae 471
Taxonomic prospects
Morphological aspects and taxonomical prospects of leaf idioblasts in Pandaceae and Caryocaraceae 31
Taxonomic significance
Foliar epidermis and taxonomy in Apocynaceae 409
Temperature
Plant age, temperature and free moisture in relation to susceptibility of clusterbean to *Xanthomonas campestris* pv. *cyamopsidis* 49
Degradation of carbofuran and carbaryl by a suspension from a flooded soil incubated at 35°C and retreated with carbofuran 299
Terminal velocity
Distribution of fungal spores within and above a crop of rice 25
Tissue culture
Plant tissue culture: Perceptions and realities 425
Tobacco callus
Growth and metabolism in cotton and tobacco callus cultures 277
Total sugars
Effect of gibberellic acid on nitrate utilization in *Sesamum indicum* seedlings 419
Trachelomonas
Contributions to our knowledge of Indian algae—3. Euglenineae Part 3. The genera *Trachelomonas* Ehrenberg and *Strombomonas* Deflandre 317
Tracheoids
Morphological aspects and taxonomical prospects of leaf idioblasts in Pandaceae and Caryocaraceae 31
Transformation
Transformation of the grain legume *Vigna aconitifolia* Jacq Marechal by *Agrobacterium tumefaciens*, regeneration of shoots 495
Triticum aestivum
Rhythmic oscillations in wheat chloroplast photochemical activity. I. Oscillations in whole chain, phtosystem II and photosystem I electron transport activities 157
Trocholejeunea
Status of *Brachiolejeunea* (Spruce) Schiffn. in India 1
Tropical plant biology
Plant tissue culture: Perceptions and realities 425
Turbulence
Distribution of fungal spores within and above a crop of rice 25

VA mycorrhiza
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
Verbenaceae
Cytology and distribution pattern of woody species of Verbenaceae in Palni hills 139
Vertical cylinder
Airborne fungal spores at Nagarjunanagar 191
Vertical distribution
Distribution of fungal spores within and above a crop of rice 25
Vesicular-arbuscular mycorrhizae
Vesicular-arbuscular mycorrhizal associations of sesamum 55
Video tracking
Computer-assisted image analysis in biological sciences 227

Wall ingrowths
Wandlabyrinthe in the embryo sac of *Nigella damascena* Linn. 261
Wheat
Rhythmic oscillations in wheat chloroplast photochemical activity II. Further characterization of the rhythm in photosystem II photoelectron transport activity 175
Wind tunnel
Wind-tunnel estimation of fungi colonizing sorghum seed from field to storage 501

Xanthomonas campestris pv. *cyamopsidis*
Plant age, temperature and free moisture in relation to susceptibility of clusterbean to *Xanthomonas campestris* pv. *cyamopsidis* 49
Xylopia
Anther development in *Xylopia nigricans* 251

Yield
Effect of some phenolic acids on quality and yield of chickpea seeds 61
Yield and oil content of doubled haploids of mustard (*Brassica juncea* (L.) Czern. and Coss.) 405

Zinc
Suitable level of zinc, copper and manganese for mass production of the vesicular arbuscular mycorrhizal fungus, *Glomus fasciculatum* 135
